EXECUTIVE SUMMARY

Commercially minded Project Controls Engineer and programme leader with 3+ years managing controls and stakeholder delivery on billion-pound infrastructure mega-projects across Egypt. Currently a Corporate Project Controls Engineer at El-Sewedy Wings (El-Sewedy Holding), delivering post-contract project controls on a c. EGP 9 billion resort development. Deep technical capability spans Primavera P6, Oracle Unifier, Power BI, FIDIC contract administration, and EVM, underpinned by an MSc PM (Merit, LJMU; dissertation graded Distinction). IEEE-published researcher in AI-driven construction decision-making, with a growing focus on applying AI/ML to project-controls work.

CORE COMPETENCIES

Project Controls & Planning: Primavera P6 · Baseline Scheduling · Critical Path Analysis · Schedule Control · Resource Planning
Cost Management & EVM: Cost Baseline · Earned Value Management (EVM) · SPI/CPI · ETC/EAC Forecasting · Quantity Surveying
Contract & Risk Management: FIDIC (Red/Yellow/Silver) · Claim Analysis · Variation Management · NEC Awareness · Risk Registers
Reporting & Business Intelligence: Oracle Primavera Unifier · Oracle ERP · Power BI · Tableau · Excel Power Query · SQL
Digital & Emerging Tech: AI in Construction · Digital Twin Concepts · BIM Awareness · Python · VBA · AutoCAD
Leadership & Business: Programme Management · Stakeholder Engagement · Change Management · Financial Modelling · Business Development

PROFESSIONAL EXPERIENCE

Corporate Project Controls Engineer

August 2026 – Present

El-Sewedy Wings, El-Sewedy Holding – Hotel Investments · Egypt

▶ Porto Ghaleb Resort — Project Controls Engineer | August 2026 – Present

Contract Value: c. EGP 9 Billion · Resort development, Marsa Alam, Red Sea
Team: In-house PMC team representing the Owner (El-Sewedy Wings)
Scope: Post-contract project controls — engagement begins once tendering has concluded

- Review and validate project baselines (schedules, milestones, deliverables), including contractor-submitted schedules from El-Sewedy Electric Infrastructure (via ÖKOPLAN) and Red Sea Contractor.
- Prepare the programme's integrated master schedule, monitor schedule performance, and report variances.
- Coordinate the integration of schedules across the programme's multi-phase delivery.
- Lead cost control reporting and implement supporting procedures and systems, including preparation of cost estimates, budgets, and control accounts.
- Monitor and report cost performance (budget vs. actuals) via earned value management (EVM) analysis, cost forecasting, and cost-focused control processes.
- Review invoices from contractors, suppliers, and service providers, and maintain records aligned with contracts, Bills of Quantities (BOQs), and project budgets.
- Collaborate with the accounting team to reconcile payment requests against actual released amounts, and support procurement with budget alignment and cost validation.
- Prepare and analyse project cash flows, commitments, and expenditures; track and report financial risks and ensure their mitigation.
- Evaluate and analyse time and cost claims.
- Deliver reporting across the programme and validate data reliability to support project reviews and executive reporting; produced the Phase 1 status presentation for the Owner and coordinate across departments as needed.

Associate Site Manager (Acting) & Project Controls Engineer

Oct 2024 – July 2026

PGESCO – Project Management Consultancy · Egypt

▶ Luxor Strategic Warehouse — Project Controls Engineer (Associate Site Manager, Acting, Aug 2025–Jan 2026) | Dec 2024 – Jul 2026

Contract Value: EGP 1.4+ Billion · Multi-contractor complex
Client: ITDA via Hassan Allam Utilities (HAU/HASWL) / A.P. Moller · Owner Consultant: Military Technical College (MTC)
Contractors: Hassan Allam Construction, El Zamil, Link Misr, OTRAC

- Controlled Primavera P6 baseline schedule and cost baseline; produced deviation analysis and corrective action reports presented to the PM and employer weekly.
- Administered FIDIC contract requirements; independently analysed and processed claims and variation orders submitted by HAC.
- Delivered daily, weekly, and monthly progress reports to ITDA and PGESCO management; developed executive dashboards for employer visibility.
- During a concurrent 6-month acting assignment as Associate Site Manager (Aug 2025–Jan 2026), additionally led day-to-day site operations across the multi-contractor complex — coordinating engineering teams, construction activities, and four separate contractor organisations simultaneously.
- Conducted QA/QC inspections on steel structures and all civil works throughout the acting assignment; enforced design specification compliance and resolved NCRs.
- Drove contractor and subcontractor coordination meetings during the acting period, maintaining programme alignment and resolving site conflicts before they escalated.

▶ East Cairo Flex Park (ECLP) — Project Controls Engineer | Oct 2024 – Feb 2025

Contract Value: EGP 2.2 Billion · Tenants: Amazon, PepsiCo, Jumia, Ibn Sinai, Haier

Client: Hassan Allam Utilities / Agility / A.P. Moller · Contractor: Hassan Allam Construction (HAC)

- Monitored schedule and cost baseline across procurement, engineering, and construction phases using Primavera P6 and Oracle Primavera Unifier.
- Built Power BI executive dashboards for real-time performance reporting to employer (HAU) and PGESCO leadership — reducing report preparation time and improving decision visibility.
- Led multi-stakeholder alignment sessions with employer, contractor, and tenants on scope, contract obligations, and programme milestones.
- Enforced FIDIC contractual requirements; tracked and processed contractual claims and variations in Oracle ERP.

Project Controls Engineer *May 2024 – Sep 2024*

Rowad Modern Engineering (RME) · Damietta, Egypt

Project: Damietta Port Container Terminal – Infrastructure & Buildings | USD 106 Million

Client: Damietta Alliance Container Terminal (DACT) · Engineer: Inros Lackner & HA Consultants

- Independently developed the project baseline schedule and cost baseline from scratch before ground-breaking — the primary controls deliverable establishing the performance measurement baseline.
- Tracked progress using Primavera P6, Oracle Primavera Unifier, and Oracle ERP; produced daily and monthly site progress reports with variance analysis.
- Supported PM in developing project execution plans; monitored procurement and engineering deliverables against programme.

Junior Site Engineer *Jul 2022 – Oct 2022*

Hassan Allam Construction & Consolidated Contractors Company JV · New Cairo, Egypt

Project: Cairo Festival City Mall Expansion (EGP 2B) · Client: Al-Futtaim Group · Engineer: EHAF

- Supervised finishing works (blockwork, plastering, flooring, cladding), excavation, and concrete pouring; first industry exposure to international client standards and contractor QA processes.

EDUCATION

MSc, Project Management — Liverpool John Moores University, UK *2024 – 2026*

- Dissertation: "AI and Building Measurement System Integration for Detailed Project Management in Construction" — Grade: Distinction
- Cumulative Grade: Merit · Part-time / Distance Learning (UNICAF Scholarship)
- 2nd paper submitted for publication: "An AI-Integrated Building Measurement Framework for Enhancing Material Quality Control" — Case Studies in Construction Materials (under review)

BSc, Civil Engineering (Structural) — German University in Cairo, Egypt *2017 – 2022*

- Thesis: "Comparison Between Structural Systems for an Elevated Monorail" — AI decision-support tool developed · Grade: A+ (Excellent)
- Cumulative Grade: Good · Major: Structural Engineering
- Honour: 1st Place, ASCE GUC Eco-Concrete Design Competition (2019)
- IGCSE: A* in Chemistry, Mathematics & Physics — Cambridge International Examinations (2015)
